

Linksys SPA400-EU

Afbeelding :

Omschrijving :

The SPA400 features the ability to connect up to four (4) standard analog telephone lines to a Linksys Voice System (LVS) VoIP network and includes the additional benefit of an integrated voicemail application. The SPA400 utilizes multiple analog phone lines and automatically routes calls to and from your existing PSTN telephone service. Designed to be implemented with the LVS IP Telephony System, the SPA400 enables cost-conscious business users to leverage the high value features generally found only on more expensive PBX equipment.

Geleverd in originele doos incl. gateway, adapter, USB voicemail module, RJ-45 ethernetkabel, 4-RJ11 telefoonkabels en installatiegids.

Lancom 1721 + VPN

Afbeelding :

Data sheet : http://www.lancom.eu/fileadmin/produkte/lc_1721_plus/1721plus_EN.pdf

Omschrijving :

Business VPN ADSL2+ router for professional site connectivity

- * Integrated ADSL2+ modem
- * 5 integrated IPsec VPN channels, upgradeable to 25, integrated hardware acceleration
- * Supports VLANs and LANCOM Advanced Routing und Forwarding (ARF)
- * Stateful-inspection firewall with intrusion detection/denial-of-service protection
- * Multiple interfaces: ISDN, USB-2.0 port, Ethernet, and serial port
- * Free management tools
- * Useful installation wizards such as 1-Click-VPN

The LANCOM 1721+ VPN is a top model in the LANCOM line of highly integrated VPN networking components designed for secure site connectivity. The LANCOM 1721+VPN already has an ADSL2+ modem on board, so it can be connected directly to the Internet. Five IPsec VPN channels are featured as standard, which can be upgraded to 25 with the VPN Option. To ensure that admins benefit from convenience during configuration, VPNs can be setup within seconds with the help of user-friendly installation wizards such as LANCOM 1-Click-VPN. The free management tool LANmonitor provides a detailed overview of the entire network. Extensive security functions such as the integrated stateful-inspection firewall provide highest levels of security. Diverse connection options such as ISDN, USB 2.0 and the serial interface provide alternatives to IP for accessing the device.
