

System administrator / Support

- **Description:**

SpamExperts BV, a key-player in the internet-security industry, is looking for an enthusiastic, pro-active, and skilled system administrator/support employee who is challenged by the idea of managing, streamlining, and optimizing the different sysadmin/support tasks for SpamExperts. You will work in a small and young team in Amsterdam of highly motivated professionals and are expected to work in a independent and proactive fashion, reporting directly to the CTO.

- **Responsibilities:**

- Support handling
- Server system administration
- Server monitoring
- Script writing for improved administration
- Management and improvement of various software applications used

- **Candidate Profile:**

- Bachelor degree or higher
- 2-5 working years experience in support/system administration
- Fast learner with respect to technological products
- Pro-active and independent worker
- Good written English/Dutch
- Good communication skills
- Organized with basic management skills
- Result oriented

- **Beneficial skills:**

- Debian Linux experience
- Bash scripting
- PHP development
- MySQL management
- Python development

- **We offer you:**

- A full-time position (40 hours)
- Attractive starting salary and regular performance-dependent salary increases
- Space for self development and personal growth
- A high performance and passionate team of colleagues

- **Are you interested?**
